Programs

```
This line accepts a key>   | >100 CALL ONKEY("123",0,K,S)
                           |   GOTO 120,130,140
Keep scanning the key.     | >110 GOTO 100
First line.                | >120 PRINT "ONE"::GOTO 100
Second line.               | >130 PRINT "TWO"::GOTO 100
Third line.                | >140 PRINT "THREE"::GOTO 100

                           |
Using GOSUB                | >100 GOSUB 110::GOTO 100
Key scan.                  | >110 CALL ONKEY("YN",3,K,S)
                           |   GOTO 120,130
First line.                | >120 PRINT "YES"::RETURN
Second line.               | >130 PRINT "NO"::RETURN
                           |
```

The above program both act like ON GOTO with the key
selecting in the string the position and line number.
