Programs

```
This line starts USER to use  | >CALL USER("DSK1.FILENAME")
Batch processing on a file     |
called FILENAME                |
                               |
Line 100 is same as above.     | >100 CALL USER("DSK1.FILE")
but within a program.          |
                               |
Line 100 variable A$ equals a  | >100 A$="DSK.VOLUME.FILE"
String-variable path name.     |
Line 110 starts USER to use    | >110 CALL USER(A$)
Batch processing on A$         |
                               |
Save this program as LOAD.     | >100 CALL USER("DSK1.BATCH")
                               |
```

  Here is an example DV80 file you save with the name BATCH.

```
            ! BATCH file for using
            NEW and CALL FILES and RUN. cr
            cr
            CALL XB("DSK1.A-PROGRAM",#) cr
            ! The # is 0 to 15 (see FILES)
```

 The above DV80 file uses cr to mean Carriage Return. And # is
for the number of files you wish open. A-PROGRAM is the name of
the XB program that needs a certain number of files open.

Options
To many to list out. See BATCH for demo.
