

```

Format      RUN "XB"

             DELETE "XB"

             CALL CAT("XB")

             OLD XB

             SAVE XB      -(Must have a program within
                           -memory to work at all)

             CALL XB

```

Description

The XB DSR (Device Service Routine) allows access to the RXB title screen. The access will work only if the DSR is in the GPLDSR or LINK DSR. In other words, a DSR that acknowledges any type of DSR in RAM, ROM, GROM, GRAM, or VDP. Most DSR's only accept DSK or PIO. Others like the SAVE or LIST commands will only work with a program in the memory first. Still others like CALL LOAD("XB") must have the CALL INIT command used first.

From EA option 5 you may type XB then enter, or from EA option 3 type XB then enter, then enter again. If the EA option 1 (edit), then 4 (print) type XB. From TI BASIC use OLD XB or DELETE "XB".

Keep in mind that if it does not work, the problem is the DSR your using. Almost all DSR's today only acknowledge the ROM or RAM DSR's. As the XB DSR is in GROM/GRAM it seems a bit short sighted on the part of most programmers to use cut down versions of a DSR. Please discourage this as it is a disservice to us all.
